User Experience Designer with people skills keen on solving real problems creatively.

A multi-disciplinary UX Designer experienced in working in a fast-paced environment where every minute delay counts to the success or failure of the task at hand.

Motivated to help users and businesses achieve long-lasting consumer-business relationships, I am seeking a UX position where I can utilise my data-based decision-making skills for the user-centred design approach and employ collaborative working skills to create simple solutions to complex problems.
